“Blenheim Community Senior Centre”

After considerable investigation into the acquisition of an L.E.D. sign our organization decided to rely on the services of DOW Signs to implement the project. The amount of information relating to this type of sign was mind blowing with a wide variety of configurations and quality available. It became apparent that we needed a supplier that was honest, reliable and very knowledgeable in the field.

I spent many hours viewing signs erected in multiple municipalities and was amazed at the difference in appearance and quality. Several signs were not functioning properly and others did not have an acceptable display. After viewing one particular sign that appeared to meet our needs in Windsor I contacted Jeff at DOW signs, the provider. I found that the business was established many years ago and had a very good reputation.

Jeff attended our Centre in Blenheim and answered all of my questions with regard to the signage. It was the professionalism, knowledge, reputation and local support that convinced us to go with one of the “Sunitron” signs.

The application software provided was intuitive and easily learned after moderate usage. Some training was provided by Sunitron and a contact number for them was provided should we have any questions.

We are pleased with our decision and have received many positive comments from the Community about the sign. After several months of use we have not encountered any issues. I would have no hesitation in recommending Dow signs as the provider of this equipment.
